Re: Beyond Wireless - ICE³ Remote Temperature Monitoring Solution

To Whom It May Concern:

This letter serves to confirm that Dis-Chem Pharmacy has successfully deployed the Beyond Wireless ICE³ remote temperature monitoring solution across our entire retail footprint for the purpose of monitoring and managing the temperatures of our dispensary and clinic refrigerators.

In making our decision on which vendor to partner with for this crucial function, we researched and evaluated numerous technologies. The Beyond Wireless system not only met all the legislative requirements but also offered an easy to deploy, easy to use turnkey solution that exceeded our expectations both technologically and operationally.

Their World Health Organisation approved technology, combined with their extensive knowledge of cold chain management and exemplary customer service, now play a pivotal role in not only ensuring our GPP compliance, but delivers real value by reducing stock losses and most importantly helping us to ensure that our patients and customers get the best possible healthcare available.

We therefore have no hesitation in recommending Beyond Wireless as your cold chain management partner of choice.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Natasha Neveling', written over a faint, illegible printed name.
