Re: Beyond Wireless – Embedded ICE³ Remote Temperature Monitoring Device

To Whom It May Concern:

This letter serves to confirm that 3rd Stone Design has successfully integrated the Beyond Wireless ICE³ Remote Temperature Monitoring Device (RTMD) into our Stone Cold Solar Mobile Vaccine Refrigerator for the purpose of monitoring the temperature and movement of life-saving Ebola vaccines.

In making our decision with which vendor to partner, we researched and evaluated numerous technologies. The Beyond Wireless system not only met all the legislative requirements as relates to the WHO PQS standard, but also offered an easy to deploy, easy to use turnkey solution that exceeded our expectations both technologically and operationally.

Their class leading technology, combined with their exemplary customer service and thorough knowledge of cold chain management, will soon play a pivotal role in the fight against the spread of Ebola in West Africa.

We have no hesitation in recommending Beyond Wireless as the RTMD partner of choice.

Yours sincerely,
